

My Community App

My Community App – A new community-driven app is poised to transform how local residents connect, work, and stay informed, offering a powerful alternative to traditional social media. The app, which has been developed to serve as a central hub for **My Community App**, is now available for download.

Unlike sprawling social media platforms, this app is dedicated to fostering a strong, local ecosystem. It aims to put the community first by providing features that directly benefit residents and local businesses. The platform is designed to be a one-stop shop for everything happening nearby, from news and events to job opportunities and emergency alerts.

A key feature is the app's commitment to supporting the local economy. It offers a dedicated space for local businesses and attractions to promote themselves, helping residents discover and support the shops, restaurants, and services that make **My Community App** unique. Additionally, the app includes a robust jobs board, connecting local employers with job seekers in the area, helping to fill vacancies and boost the local workforce.

In a move to strengthen local journalism, the app has a built-in volunteer reporter system. This empowers residents to become a part of the news process, reporting on local happenings and sports events. It ensures that news is timely and hyper-local, with stories that truly matter to the community.

Safety is also a top priority. The app features a critical **Emergency Broadcast System**, allowing local authorities to quickly and effectively communicate with residents during an emergency. This system provides a reliable and direct channel for crucial alerts, keeping everyone safe and informed when it matters most.

The app is not just a tool for connection and information; it's a way for the community to invest in itself. The developers have pledged to share all profits directly with the local community, ensuring that the app's success contributes to local projects and initiatives, creating a truly circular economy.

"We believe that a strong community is a connected community," said a spokesperson for the app. "This platform is a testament to that belief. It's built for locals, by locals, and its success is shared by locals. We invite everyone in **My Community App** to join us and discover a new way to engage with their community."

My Community App

Key Features at a Glance.

The **My Community App** packs a wide range of powerful features into a simple, easy-to-use platform. Here are just a few of the things you'll find inside:

- **What's On Page:** A dedicated page with real-time information on local events, news, and activities.
- **Local Events Page:** A dedicated page with real-time information on local events upcoming throughout the year, easily shared to your personal calendar.
- **Local Business Listings:** A dedicated page for all local businesses to list their business and place advertising as well as publish 1 company event per/y.
- **Local Jobs:** A jobs board connecting local employers with job seekers.
- **Emergency Broadcasts:** A critical system for receiving urgent alerts from local authorities.
- **Community Reporter System:** A way for local residents to volunteer and report on local news and sports.
- **A Lost and Found:** dedicated options to post lost items and found items directly to the local community.
- **Your Personal Diary:** You can add your own events and set reminders to stay organised.
- **Tourist Information:** The app doubles as a digital guide to local attractions and events.
- **Community Visiting:** The ability to visit other communities using the app and see what's on in their areas as well as messages and announcements.
- **Community-Driven Donations:** Profits from advertising are shared directly back to the local community that set up the community group, at a 40% profit share.
- **AI Assistant:** A helpful AI assistant that provides immediate, context-aware assistance and filters out keywords and images shared in the APP.
- **And more,** Currently and continually developing new pages and technologies to incorporate into the Online My Community hub

Your Digital Tourist Information Centre in Your Pocket

The **My Community App** is the next best thing to a truly interactive tourist information centre. It is a comprehensive digital guide to your local area, designed to help you, and visitors discover and experience everything your community has to offer. The app's "**What's On**" page provides real-time information about events, local news, and activities, ensuring you're always in the know about the latest happenings.

Whether you're looking for a local farmers' market, a charity event, or a one-off festival, the app makes it effortless to find what you're looking for. The content is curated and updated by the community leaders themselves, guaranteeing it's accurate and hyper-local. You'll also have access to a full annual events calendar, so you can plan your year and never miss out on key local celebrations. It's the ultimate tool for both residents and visitors to truly engage with the community.

How to Install the App on Your Device

Forget the app stores! The **My Community App** is a Progressive Web App (PWA), which means you can install it directly from your web browser. This gives you all the benefits of a native app—like an icon on your home screen and the ability to work offline—without needing to go through a store.

Here's how to do it:

On iOS (iPhone/iPad):

1. Open the app's website in Safari.
2. Tap the **share** icon (the box with an arrow pointing up) at the bottom of the screen.
3. Scroll down and tap **Add to Home Screen**.
4. A preview will appear. You can change the name if you like, then tap **Add**. The app icon will now appear on your device's home screen.

On Android:

1. Open the app's website in Chrome or another web browser.
2. A small banner may appear at the bottom of your screen asking you to "**Add My Community App to Home Screen**" or "**Install**." Tap it.
3. If the banner doesn't appear, tap the **three-dot menu** in the top-right corner of your browser.
4. Tap **Install app** or **Add to Home Screen**.
5. The app icon will now appear on your device's home screen.

Now you can launch the app with a single tap, just like any other app on your phone.
